USB Software Update

Warning:

DO NOT MIX UP THE SW RELEASES - SW releases are specific to each product.

Process:

1. Copy the **software.swu** file to a USB drive - NO DIRECTORIES!
2. Eject USB from laptop to ensure writes are complete before you pull it.
3. Insert into the SDR/SDP.
4. Press **...** button to open the settings menu. Navigate to:
   Settings → General Setup → USB Update → Confirm.
   - This will start the update of the NET SW.

   Do not remove power during a software update!

   - The unit will reboot when it is complete.
5. The unit is now ready to be used.
